InterPro Domains PMM2 O15305

5 entries:

- NAME: Phosphomannomutase
- CODE IPR: IPR005002
- TYPE: F (family)
- POSITIONS: 1 - 245
- INCLUDES 237?: Yes

- NAME: HAD-superfamily hydrolase, subfamily IIB
- CODE IPR: IPR006379
- TYPE: F (family)
- POSITIONS: 9 - 225
- INCLUDES 237?: No

- NAME: HAD superfamily
- CODE IPR: IPR023214
- TYPE: H (homologous superfamily)
- POSITIONS: 8 - 242
- INCLUDES 237?: Yes

- NAME: HAD-like superfamily
- CODE IPR: IPR036412
- TYPE: H (homologous superfamily)
- POSITIONS: 8 - 244
- INCLUDES 237?: Yes

- NAME: Phosphomannomutase, cap domain
- CODE IPR: IPR043169
- TYPE: H (homologous superfamily)
- POSITIONS: 86 - 187
- INCLUDES 237?: No

Accession	Short Name	Name	Source Database	Matches
IPR005002	PMM	Phosphomannomutase	InterPro	
IPR006379	HAD-SF_hydro_IIB	HAD-superfamily hydrolase, subfamily IIB	InterPro	
IPR023214	HAD_sf	HAD superfamily	InterPro	
IPR036412	HAD-like_sf	HAD-like superfamily	InterPro	
IPR043169	PMM_cap	Phosphomannomutase, cap domain	InterPro	

Rows per page: 20 ▾ Previous 1 Next

Conclusion: Position 237 lies within the broad family and superfamily annotations, which span almost the whole protein, but outside the more specific cap domain (residues 86-187) and HAD subfamily IIB region (residues 9-225).
